

# YITONG CHEN

## Software Engineer

<https://cecilia-website.onrender.com/>

Computer Science undergraduate at the University of St Andrews, graduating in 2026, with hands-on experience in software testing, hardware testing, web development, game development, and data processing.

## Work Experience

May 2024 – August 2024 | Vibe Inc

### Software Test Engineering intern

- Build a testing framework and define testing parameters based on inputs from the product design team.
- Use the testing framework to monitor the process, document the results and take steps to troubleshoot.
- Develop multiple test cases and create appropriate testing environments for checking a product.

Sept 2024 – Jan 2025

### Hardware Test Engineering

- Designed and executed test cases, focusing on product functionality under different testing conditions.

## Project Experience

### Java

Independently completed multiple Java projects, including Graphic User Interface (GUI), Object-Oriented Programming (OOP), AI games, AI chat systems, Unified Modeling Language (UML), Java Remote Data Processing (JavaRDD), TCP-based Web application development, SQL data retrieval, etc.

### Web Interactive Project

Developed an interactive web project using SQL, HTML, Java, strengthening frontend and backend development and database interaction skills.

### Haskell Programming Project

Participated in a team project developing a game written in Haskell, enhancing team collaboration and feature design skills.

### Python

Contributed to the development of a Python software for scientific research, enhancing data processing and analysis skills.

### Team Project Experience

Participated in at least 5 group projects using Haskell, Java, Python, etc., cultivating cross-language development and team collaboration skills.

### Unity2D RPG Game

- Ruby's Adventure, designed and implemented a user-friendly game interface
- Unity2D Game based on HCI (dissertation) - How educational games support learners in understanding the heuristic principles

## Education

Sept 2022 – July 2026

### University of St Andrews

BSc (Hons) in Computer Science

## Technical Skills

Testing: Software testing, hardware testing, test case design, test execution, test report writing, debugging, troubleshooting, test environment setup, functional testing, basic automation testing.

Programming Languages: Java, Python, C, C#, Haskell, JavaScript, SQL.

Web Development: HTML, CSS, JavaScript, frontend/backend interaction, web application testing, user interface design.

Software Development: OOP, algorithms, data structures, GUI development, UML, TCP-based web development.

Database: MySQL, SQL, database, Pandas, NumPy, data processing, data analysis.

Tools: Git, Linux, VS Code, Vim, Unity, command-line tools, Tableau.

Languages: Mandarin Chinese, native; English, fluent.
